Subject: Request for EPA Review
CC: Becerra, Mayor Pro Tem; Foster, Council Member; Miller, Mayor; msedell; Sojka, Council Member; Williamson, Barbra

---

John,

On behalf of the Simi Valley City Council, this is a request that EPA conduct an independent review of data and reports related to the potential or actual presence of strontium 90 in Runkle Canyon and to advise whether development of the site poses a public health risk. To this end, it is requested that EPA review the environmental impact report documents on the subject project, as well as data that concerned citizens referenced when they presented their concerns to the City Council on August 21 and September 25. It should be noted that the City Council is interested in ensuring that a safe environment exists for the planned residential development in the area, and that an independent examination of the facts is undertaken. The City Council has no preconceived expectation of what the results of this examination will provide.

Please let me know at your earliest convenience whether EPA will conduct this review and where I should forward the relevant documents. As grading plans are close to approval, time is of the essence.

Thank you for your assistance.

Laura Behjan
