Type of Use:
Description of the proposed project:

Applicant Signature: Date:

Table with Required Attachments list and ID field. Attachments include site map, square footage, dwelling units, bed count, student count, seating count, construction drawings, and connection fees receipt.

A "Sewer Availability Letter" may be required to document that the City of Simi Valley sewer services are available to the property and identifies whether there is capacity in the Wastewater Quality Control Plant (WQCP) that will serve the proposed development.

A "Sewer Will-Serve Letter" provides assurance that the City of Simi Valley will provide sewer services, under specified conditions, to a property. Generally, a Sewer Will-Serve Letter is required for a property owner to obtain a Building Permit from the property's land use jurisdiction (this could be either the City of Simi Valley or the County of Ventura).
